GH2 | PRESERVATION ARCHITECTS

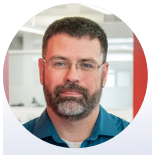
GH2 Preservation Architects, a specialty practice of GH2 Architects, LLC, is dedicated to the preservation, rehabilitation, and adaptive re-use of historic and existing structures. With more than five decades of award-winning experience, our team helps clients protect the architectural cultural integrity of their buildings while adapting them to function effectively for modern needs. We support owners through every phase of the preservation process—from early field assessments to tax credit application assistance to full design and construction documentation. Our experience, technical skills, and commitment to excellent service result in projects that honor the past and perform for the future.

Historic Assessment, Investigations, Analysis, Research, and Documentation: The GH2 team employs the latest 3D digital scanning technology to accurately capture both large and small spaces, including hard-to-access areas such as attics and above-ceiling cavities. During on-site scans, we collect precise measurements and detailed spatial data, which are then imported into Autodesk Revit. This integration enables our designers to develop highly accurate building information models and construction documents. Utilizing our drone and infrared camera systems, we can survey all vertical surfaces of existing structures. In addition to digital scanning, we conduct supplemental materials testing and field verification to thoroughly document existing conditions, enabling us to develop a comprehensive understanding of the existing structure. The resulting investigation reports clearly outline deficiencies and categorize recommended repairs or maintenance into immediate, 5–10-year, and 10–20-year timeframes. This helps owners prioritize capital planning and budget allocation with confidence.

SERVICES

Rehabilitation, Restoration & Reconstruction | New Exterior Additions | Historic Research
Feasibility Studies | Preservation Planning & Phasing | Grant Application Assistance
Existing Facilities Survey & Conditions Assessment | Historic Properties Management Plans
HABS & HAER Documentation | Federal & State Historic Preservation Tax Credits
State Landmark Designations | National Register Nominations | Section 106 & 110 Process Review

LEADERSHIP



TIMOTHY HERZER, AIA
Principal | Architect
Historic Preservation
Practice Director

MINDY GRAY, AIA, LEED AP BD+C
Practice Principal - Historic Preservation Architect

MATT JENNINGS, AIA
Senior Preservation Architect
