GH2 | EQUINE ARCHITECTS

GH2 Equine Architects, a dedicated specialty practice of GH2 Architects, LLC, is an award-winning, international architecture and planning firm with more than five decades of experience delivering transformative design solutions. Since 1973, we have advanced the planning and design of equine and animal-care environments through a deep understanding of the operational, safety, and performance needs unique to these facilities.

Our team has planned and designed many of the world's foremost equine amenities across five continents, elevating global standards for sophistication, functionality, safety, and operational efficiency. From state-of-the-art veterinary hospitals and equine show venues, to University facilities, Polo clubs and private training, breeding, and boarding operations, our portfolio reflects unmatched breadth and technical experience.

A defining strength of GH2 Equine Architects is that our team members are not only architects and designers—we are active equestrians and facility users. This lived experience allows us to translate day-to-day needs into practical, high-performing design solutions. Our ongoing engagement with riders, trainers, veterinarians, operators, and industry leaders ensures our clients benefit from the latest insights, innovations, and best practices within the equestrian world. Our commitment to this specialty practice—and the clients and communities it serves—remains unparalleled.

SERVICES

We provide comprehensive equine facility master planning—from barns, arenas, and pastures to roads, manure management, and fire safety—helping new or existing facilities align big-picture goals with efficient operations, safety and cohesive design. GH2 delivers unique design solutions with services tailored to the needs of each project and property.
